OBJECTIVE

To gain practical experience in a company, apply technical skills, contribute to projects, and expand knowledge while seeking personal and professional growth. Excited to collaborate with a dynamic team and make a positive impact on innovative tech solutions.

PROFESSIONAL PROFILE

Highly motivated and innovative Artificial Intelligence and Data Science student, set to graduate in June 2027, seeking to expand my skillset through participation in various hackathons and competitions. I am eager to tackle real-world challenges, develop my problem-solving abilities, and collaborate with like-minded individuals to drive creative solutions. By engaging in these opportunities, I aim to bridge the gap between theoretical knowledge and practical application, preparing myself for a successful career in AI and Data Science.

EDUCATION

Bachelors in Artificial Intelligence and Data Science, A.D. Patel Institute of Technology (2023 – 2027)

Relevant Coursework: C, C++, Java, Python, OOP, Data Structures and Algorithms, Operating System, DBMS, Artificial Intelligence, Machine Learning, Web Development.

Higher Secondary Education (H.S.C.), Ashadeep IIT - Surat (2021 – 2023)

Secondary School Certificate Exam (S.S.C.), Ashadeep School - Surat 2021

SKILLS

Technical Skills	Python, C, C++, MySQL, HTML, CSS, Java script, Node.js
Soft Skills	Communication Skills, Teamwork and Management, Adaptability, Data Analysis, Creative Thinking, Leadership, Time Management
Areas of Interest	C, C++, Python, Artificial Intelligence, Deep learning, Machine Learning

LANGUAGES

English

Gujarati

Hindi

EXTRA-CURRICULAR ACTIVITIES

- **ODOO (2025)** Participated in the Odoo Hackathon and developed *StackIt*, a minimal question-and-answer platform built with HTML, CSS, JavaScript, and Node.js, designed to enable collaborative learning and structured knowledge sharing.
- **SMART INDIA HACKATHON (2024)** Our goal was to integrate artificial intelligence and data science with web development to enhance a railway management system using Google API.
- **LLAM (2024)** Our project focused on plant growth, using AI to determine the ideal nature, temperature, and fertilizers required for optimal development.
- **CVMU HACKATHON (2024)** Our project focused on an Air Quality Monitoring System designed to measure key air quality parameters, including particulate matter (PM), carbon monoxide, and nitrogen dioxide.
